

## REGION 6 EXECUTIVE SUMMARY

**DATE:** June 21, 2011

**TOPIC:** Gulfco Marine Maintenance – 104(e) Information Request

**DEADLINE/DUE DATE:** As soon as possible

**ACTION REQUIRED:** Associate Director's Signature

---

**BACKGROUND:** The Gulfco Restoration Group, comprised of four PRPs conducting the RI/FS under a UAO, requested the EPA consider issuing General Notice Letters to other PRPs known to have arranged for disposal of hazardous waste at the Site. To support this request, the PRP Group submitted a report summarizing the EPA records. This led to issuance of GNL to four PRPs on June 13, 2011.

**CURRENT STATUS:** The Site Team reviewed the PRP Group's report and compared it to information in the Removal Report and RI Report. Based on the review, the Site Team recommends issuing 104(e) Information Requests to seven PRPs as part of the PRP Search Update Process. Issuing additional General Notice Letters, as requested by the PRP Group, is not supported by information currently known by the EPA. This information will help determine if additional PRPs should be noticed for future activities.

**PRPs to receive this 104(e) Information Request:**

Ashland Oil  
Dupont  
ConocoPhillips  
Ingram Barge  
J&S Contractors  
Stolte-Nielsen  
Western Seafood

**TECHNICAL CONCERNS:** None are known.

**COMMUNITY CONCERNS:** None are known.

**CONTACT/TELEPHONE NUMBER:** Kevin Shade, Enforcement Officer, x-2708
